

Drive with confidence with a Japanese-standard dashcam, equipped with built-in tracking and ADAS.

This cutting-edge technology is designed to monitor driving conditions and assess driver behavior.

EASY VIDEO MONITORING

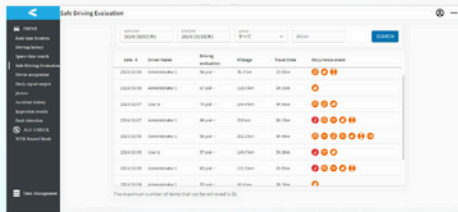

- > Auto data upload for the incident/danger behaviour.
- > Remote access to SD storage.

FLEET MANAGEMENT

- > Realtime location track per 15 sec.
- > History data stored to cloud for 1 year.

REDUCE ACCIDENTS

- > Driving evaluation with objective judgement.
- > Visualize prediction, avoid possible incident/accident.

DATA OPTIMIZATION

- > Auto generates daily drive report by VMS + Cloud.
